

To Whom It May Concern:

This is a concern that affects all at some level as a Registered Nurse I see the concerns everyday about the cost of healthcare. Every person should have healthcare coverage one never knows when it will be desperately needed. This issue affects young and old although the elderly have medicare. With unemployment rampant and cobra so expensive this cost is one no one should have to be concerned about.

I am the parent of teenagers who have coverage at present but what happens when they become of age. If they decide to go to college less than full time they loose coverage. Once they graduate they loose coverage also. Employers are not offering healthcare to prospective employees. We must act on this issue immediately. This should not be of concern to anyone low cost healthcare should be available to all with a prescription plan. No one should go untreated due to worry over costs.

Sincerely  
Carmela Sansone
